

CHAPTER XXII. PRE-FABRICATED METAL BUILDINGS STANDARDS

ARTICLE 1. General Provisions

---

ARTICLE 1. GENERAL PROVISIONS

- 22-101. PURPOSES. Standards for Pre-fabricated Metal Car Ports/Pre-fabricated Metal Utility Buildings: Buildings of this type must be anchored at all four corners with additional anchors spaced at distances not to exceed 10 feet apart. Anchors are to be, at a minimum, of a screw-in type anchor rod, installed to a ground depth of not less than 24 inches. Banding straps of not less than 1 inch wide and made of minimum 26 gauge metal, steel cables of not less than ¼ inch in diameter shall be utilized in connecting the anchor rods to the bottom of the building's roof trusses. Such banding straps or cables shall be fastened within the bottom 3 inches of the roof trusses.
